PROJECTS

NESTQUEST, *An interactive hotel and travel booking app built with JavaScript, HTML, JSON, and localStorage. Allows users to browse and book hotels seamlessly while storing preferences for a personalized experience. Features dynamic data management and a responsive, user-friendly interface.* ⊘

Portfolio, *A modern, responsive portfolio website built with HTML, CSS, and JavaScript. Showcases personal projects with a clean, professional UI and interactive elements for enhanced user engagement. Designed to be fully responsive across devices, highlighting creativity and technical skills.* ⊘

cakeProject, *An e-commerce platform for purchasing customized cakes, built with PHP, Laravel, MySQL, and following the MVC architecture. Features a user-friendly interface, secure user authentication, and role-based access for customers and admins. Utilizes MySQL for efficient data management and focuses on seamless navigation with responsive design for an optimal shopping experience.* ⊘

HULU, *The project is a movie website developed using PHP and Laravel as the backend framework, with React used for the frontend. The site provides an API to enable interaction between the server and the user interface, fetching and displaying movie information such as titles, genres, and reviews in an interactive and user-friendly manner.* ⊘
